1. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

The document **D1** discloses (the references in parentheses applying to this document):

An assembly for the carriage of skis across a surface (Fig. 1), said assembly including a reception (Fig. 1(1)) means for the reception of an end of the skis, and gripping means (Fig. 1(13) the loop of the elastic band is considered being possible to use as a grip, at least in combination with the binding)) wherein said reception means are connected to at least one wheel, roller and/or skid (Fig. 2-4) for contact with the surface to allow the skis to be pulled or pushed by a person along the surface and said gripping means are attached to the skis at a location remote from the reception means.

2. Dependent claims 1-20 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step, see documents D1-D6 and the corresponding passages cited in the search report.
3. If amendments are made to the application, the claims 16 and 20 should also be amended since they are dependent on impossible claims (non-existing claims or
